

Fizz.im: Intranets

“Building more engaging and interactive bespoke company intranets incorporating the latest Web 2.0 features and industry best practice”

Fizz intranets

The **Fizz™** team provides end-to-end consultancy, development and activation services to build an **engaging, interactive corporate intranet** that makes use of **Web 2.0** features.

We can implement this **within your working procedures**, ensuring the value is maximized throughout the organisation.

All **Fizz™** products are **built in line with Microsoft’s patterns and practices**, enabling us to work with your IT teams to implement and manage an intranet seamlessly.

We have **vast experience** developing and integrating common intranet tools from a **Fizz™** platform – but these can **easily be built into non-Fizz™ intranet developments**.

Please contact us for more information.

“ Fizz means we get far greater value from each of our (market research) studies. There's absolutely no risk that a project will simply sit on the shelf ”
